Although \$10,000.00 appears to be (by U. S. standards) very reasonable financing for an additional 80 persons at the [REDACTED] Map Service, there does not appear to be adequate justification for Agency support of the proposal. Informal inquiry at AMS, where they are fully aware of the problem, supports this thesis. Primarily, it is a question whether or not sufficient data (of superior quality) exists on Mainland China to warrant the enlargement of the mapping facility beyond the support already given.
